PROFESSIONAL SUMMARY

AWS and DevOps Engineer with hands-on experience designing, deploying, and automating secure, scalable cloud infrastructure. Proficient in Infrastructure as Code (Terraform), CI/CD pipeline automation (Jenkins), containerization (Docker, Kubernetes), and core AWS services including EC2, VPC, RDS, Lambda, S3, and CloudWatch. Experienced in building highly available multi-tier architectures, implementing monitoring with Prometheus and Grafana, and troubleshooting infrastructure, deployment, and networking issues across 12+ cloud and DevOps projects.

CORE SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, RDS, Lambda, CloudWatch, ALB/ELB, Auto Scaling, CloudFront, ECS, ECR, EKS)

CI/CD & DevOps Tools: Jenkins, Docker, Kubernetes, Terraform, Docker Compose, Maven, Git, GitHub, AWS CodePipeline, AWS CodeDeploy

Monitoring & Observability: CloudWatch, Prometheus, Grafana

Linux & System Administration: Amazon Linux, Ubuntu, LVM, Disk Partitioning, File System Management, Archive & Compression, Log Management, User/Group Management, File Permissions, ACL, sudo, Process & Service Management, System Troubleshooting

Networking: TCP/IP, OSI Model, DNS, Subnetting, Routing, NAT Gateway, Security Groups, Network ACLs

Scripting: Bash

PROFESSIONAL EXPERIENCE

AWS & DevOps Engineer Intern

Jan 2025 – Jun 2026

Bdreamz Global Solutions Private Limited, Bengaluru

- Automated provisioning of AWS infrastructure (EC2, RDS, Lambda, VPC, IAM, S3) using Terraform to enable repeatable, consistent cloud deployments.
- Architected secure AWS networking environments using VPC, public/private subnets, Internet Gateway, NAT Gateway, route tables, and security groups.
- Built and maintained Jenkins CI/CD pipelines to automate application builds, testing, Docker image creation, and deployment workflows.
- Containerized applications with Docker and orchestrated deployments using Kubernetes and AWS ECS to improve scalability and delivery speed.
- Delivered 12+ hands-on AWS and DevOps projects spanning cloud infrastructure, CI/CD, CDN configuration, monitoring, Terraform automation, Kubernetes, and disaster recovery.

MERN Stack Developer Intern

Feb 2024 – Jun 2024

Solitaire Infosys, Mohali

- Developed and maintained full-stack web applications using HTML, CSS, JavaScript, React.js, Node.js, and MongoDB.
- Built and modified React.js frontend components and implemented backend functionality using Node.js.
- Managed application data storage and queries using MongoDB.
- Collaborated on source-code management and version control using Git and GitHub.
- Tested application features and resolved UI and functionality issues throughout development.

PROJECT EXPERIENCE

Scalable Web Application with Load Balancing & Auto Scaling — [GitHub](#)

EC2 | ALB | Auto Scaling | RDS MySQL | VPC | NAT Gateway | Security Groups | SNS

- Designed and deployed a secure multi-tier AWS architecture using public/private subnets, EC2, RDS, and VPC networking.
- Configured Application Load Balancer, target groups, and health checks to distribute traffic across backend EC2 instances.
- Implemented an Auto Scaling Group with CPU-based target tracking to automatically scale EC2 instances based on workload.
- Configured a Bastion Host, NAT Gateway, security groups, and private routing for secure administration and outbound connectivity.
- Integrated Amazon SNS with scaling events and troubleshoot application, database, health-check, and target-group issues.

Custom VPC Architecture with Bastion Host & NAT Gateway — [GitHub](#)

VPC | EC2 | Internet Gateway | NAT Gateway | Route Tables | Security Groups

- Designed and implemented a custom AWS VPC architecture with public and private subnets for secure network isolation and controlled inter-component communication.
- Configured Internet Gateway, NAT Gateway, route tables, and security groups to manage inbound/outbound traffic and enable private-instance internet access without public exposure.
- Deployed backend applications on private EC2 instances behind an Application Load Balancer for improved availability and reliability.
- Implemented a Bastion Host in the public subnet to provide secure SSH access to private EC2 instances without assigning public IP addresses.
- Troubleshoot and resolved SSH connectivity, route table, security group, key-permission, and private-instance internet access issues.

Multi-Region Disaster Recovery — [GitHub](#)

VPC | EC2 | ALB | RDS | Bastion Host | NAT Gateway | Security Groups

- Designed a multi-region AWS disaster recovery architecture with Mumbai as the primary region and Singapore as the recovery region.
- Built secure VPC environments using public/private subnets, route tables, Internet Gateway, NAT Gateway, and security groups.
- Deployed backend applications on private EC2 instances with Application Load Balancers for traffic distribution.
- Configured Amazon RDS cross-region Read Replica for database replication and disaster recovery.
- Validated recovery by promoting the replica and switching application traffic to the secondary region.

End-to-End DevOps CI/CD Pipeline — Customer Support Ticket System — [GitHub](#)

AWS EC2 | Jenkins | Docker | Kubernetes | SonarQube | Prometheus | Grafana

- Built an end-to-end CI/CD pipeline using Jenkins and GitHub, automating code integration, SonarQube analysis, Docker image builds, and application deployment.
- Containerized MERN frontend and backend applications using Docker and pushed images to Docker Hub.
- Deployed applications on Kubernetes (Minikube) using Deployments and Services for container orchestration.
- Implemented Prometheus and Grafana to monitor Kubernetes cluster, CPU, memory, pod, node, and application metrics.
- Troubleshoot Docker permissions, Jenkins pipeline configuration, SonarQube integration, Kubernetes deployments, and service connectivity issues.

EDUCATION

Bachelor of Computer Applications (BCA)

Oct 2021 – Sep 2025

Bhai Gurdas Institute of Engineering and Technology | CGPA: 7.6 / 10

CERTIFICATIONS & TRAINING

- AWS Cloud, DevOps Engineering & CCNA — Besant Technologies | Jan 2026 – Jul 2026
- MERN Stack Development — Solitaire Infosys, Mohali | Feb 2024 – Jun 2024
